

National Refuse Championships

Rules of Competition

1. Each team shall consist of four loaders plus one driver.
2. The race will be controlled by –

The Referee

Responsible for ensuring that all teams abide by the rules of the competition and whose decision is **final** regarding any dispute that may be raised during the competition.

The Starter

Responsible for signalling the start of the race and re-assembling the teams should the race have to be re-started.

The Lines People

Responsible for checking the team nearest to them on the course is abiding by the rules of the competition and indicating to the penalty counter any penalty points that should be issued to the team by raising a flag.

The Timekeeper

Responsible for taking the time that the team nearest to them takes to complete the race. Timing will start at the given signal and stop when both rear wheels of the vehicle have crossed the finish line into section 5 after the team has completed the race according to the rules of the competition.

The Penalty Counter

Responsible for noting any penalty points to be deducted from the team as indicated by the Lines Person and then passing this information along with the time taken by the Timekeeper to the score table.

3. A penalty point (**P.P**) will result in three seconds being added to the team's finish time. The decision of the referee will be final on the issuing of penalty points.
4. Where a rule is followed by **P.P** this indicates that a penalty point will be given for failure to abide by the rule.
5. At the start of the race the vehicle shall be parked in section 2, with the teams including the driver waiting in the crew box in section 3.
6. At the given signal, the driver will run to, board and start the vehicle as quickly as possible.
 - 6.1 Timing for the race will start at the given signal.
 - 6.2 The vehicle doors must be closed before the vehicle starts to move. **P.P**
 - 6.3 If a driver fails to start the vehicle, both teams will return to the starting positions and the race will be re-started. Failure to start the vehicle a second time will result in the non-starting team being eliminated. The other teams should continue the race against the clock for rounds one and two and the teams time included in the rounds over times. In knockout rounds the team will automatically move forward to next round unless the round is the final of the competition when the non-starting team will be given a third attempt. If on the third attempt the driver again fails to start the vehicle the other team will be the overall winner of the competition.
7. The driver will then drive the vehicle through section 3 into section 4 and stop the vehicle apply the handbrake and leave the vehicle running. The driver must then leave the cab and run to the back of the vehicle and operate the lifting equipment to empty the bins into the rear hopper.
 - 7.1 The rear wheels of the vehicle must be completely over the line dividing sections 3 and 4 before the team can continue the race. The Lines Person will indicate to the driver if the rear wheels are not over the dividing line.
 - 7.2 The driver is not allowed to reverse the vehicle.

8. Two loaders will then run back to section one to collect the two 240 litre wheelie bins and run back to section 4.

8.1 The bins must be rolled on the floor always. **P.P**

9. The 240 litre bins must then be lifted and tipped into the rear hopper using the lifting equipment.

9.1 The bins can only be removed from the lifting equipment when both wheels are touching the ground. **P.P**

10. The bins must then be returned to section 1 and the team members return to the crew box.

10.1 The bins must be wheeled back to section 1 and not thrown or lifted. The bins must be placed back in the section so that they remain in designated area. **P.P**

11. Once the two members have returned to the crew box until the first two start to run back to section 1 to collect the 1100 litre bin.

11.1 The remaining two loaders must not leave the crew box until the first two loaders are back in the box. **P.P**

12. The 1100 litre bin must be wheeled to the vehicle and the lifting equipment used to tip the bin into the rear hopper and then returned to section 1.

12.1 The bin cannot be removed from the lifting equipment until all four wheels have touched the ground. **P.P**

12.2 The bin must be wheeled always and not be thrown back into section 1. **P.P**

12.3 The bins must be wheeled back to section 1 and not be thrown or lifted. The bins must be placed back in the section so that they remain in the designated area. **P.P**
